
Minimum-Energy Control in the Sense of the Deformable Derivative : A Study of the One-Dimensional Case

Cheikh SECK

Université Cheikh Anta DIOP de Dakar, Sénégal, cseck2003@yahoo.fr.

This work deals with minimum-energy control for one-dimensional systems in the sense of deformable derivative. Both non-singular and singular cases are studied, using the Weierstrass decomposition. Numerical examples and simulations illustrate the effectiveness of the proposed approach and confirm the validity of the results obtained.
